Jojoba oil has been used by Native Americans for centuries to treat skin wounds, but it didn't become widely known to most of the rest of us until the 1970s. Since then, its popularity has grown due to the amazing benefits it provides.

- As an anti-bacterial
- As an anti-inflammatory
- As a moisturizer
- As an acne treatment

Shea Butter has natural anti-inflammatory properties.

Want wrinkle prevention? In the areas of Africa where Shea Butter is widely used, the elders have amazing skin. Shea Butter contains essential fatty acids, along with Vitamins A and E, which are essential to maintaining skin elasticity and softness.

If you are prone to hyper pigmentation or dark marks, regular use of Shea Butter can help even your skin tone. The anti-inflammatory properties of Shea Butter can help to reduce the redness of acne. Also, Shea Butter is excellent for fading dark marks and acne scars. It naturally contains vitamins A and E.

Castile soap is your best choice for helping to clean and calm your skin. This is because it's made from olive oil, which also has a proven benefit for softening and calming problematic skin. Castile soap naturally possesses antibacterial properties. Castile soap is a non-toxic alternative for people who suffer from sensitive skin, suffer from eczema, from psoriasis or acne. The soap contains natural antibacterial properties that will help kill the bacteria that causes acne.

Essential Oils are nature's medicine and contain anti-aging properties as well as healing properties. They are the natural aromatic compounds found in seeds, bark, stems, roots, flowers, and other parts of the plant. The essential oils in our products are as follows.
